CAREER GOALS

I want to learn experience and change myself to become Professional Full Stack. Know how to develop and operate a large system.

TECHNICAL SKILLS

FRONT END	BACK END
HTML - CSS - JS	NodeJS - NestJS, Express
React	PHP - Laravel
VueJs	MySQL
JQuery	Postgres

FAMILIAR

Jira	Docker
Github | GitLab	Linux

CAPABILITIES / SKILL

Complex problem solver

I have debugged difficult issues in the project and tried to fix it

Manager

I have experience managing teams, managing work progress and features on large projects with fairly limited time requirements.

Team work

I worked with a team with 10+ members, understood how to work together and solve problems, share information among project members.

Research

I have researched methods to complete project requirements and I was able to learn new technologies

Working remotely

Learned how to work and communicate effectively with team when all worked remotely

SUMMARY

Throughout my journey of developing web projects, I've encountered numerous challenges and gained valuable insights at every stage. With proficiency in both Node.js and PHP, I've been able to build diverse and flexible web applications. Project management is an integral part, and I take pride in the solid foundation I've established in this area. Programming isn't just a job for me; it's my passion. I'm constantly seeking opportunities to learn and adapt to new technologies, thereby enriching my expertise and keeping myself up-to-date in the ever-evolving field of information technology.

EXPERIENCE

Now

LAIDON VIETNAM

Full Stack Developer
